

SARA CLAYTON

PROFILE

I am an interdisciplinary designer with backgrounds in enterprise UX design, product management, and web development.

EXPERIENCE

Microsoft – Interaction Designer, Windows 10 Internet of Things
July 2017 to Present

Creating wireframes, prototypes, and iconography and leading implementation for consumer and enterprise-facing Windows 10 IoT tools and sites.

Managing design and engineering workstreams for Windows Internet of Things developer tools, site, and content.

Microsoft – User Experience Designer, Microsoft.com
September 2016 to July 2017

Led design process for design and development for a pilot project in partnership with Microsoft Philanthropies and the Hearing, Speech and Deaf Center of Puget Sound.

Managed workstreams for content and design in redesign for Microsoft Careers site and experience. Conducted competitive research and analysis for information architecture of site.

Created wireframes and high-fidelity compositions for redesign of corporate intranet, used by Microsoft employees and vendors worldwide.

Microsoft – Product Marketing Manager, Cloud Platform
September 2015 to September 2016

Established and created content for new and existing social channels for the Open at Microsoft brand by introducing branding and messaging to a non-Microsoft developer audience.

Led logistics and communication among engineering and marketing stakeholders for Microsoft's presence at third-party events in order to effectively promote speakers, feature messaging and drive overall perception change.
