About Me

I just completed a 6 month internship for Murdoch's Ranch and Home supply in Bozeman, MT. There I was primarily responsible for implementing site changes as well as implementing several of their Marketing driven online campaigns.

I have done quite a bit of soul searching over the last six months. At my core what I am looking for is a place where I can work with a great team, designing cool things that help people in their day to day lives.

I am ready to find a place where I can grow professionally and creatively, to be a valued member of a team.

Fun Facts:

- ◆ 1200+ Twitter followers.
- ◆ Self-taught designer.
- ◆ Passion for creating user interfaces that require "out of the box" thinking.
