OBJECTIVE | To make games. If I can do that I am happy. I recently graduated from WW.IT-IQ with a wide array of skills. I am competent in 3D Modeling as well as programming, but I am a programmer through and through. I love to make games and have been doing so since I first started coding in Grade 10 IT. Since then I've made a lot of small games and participated in various Game Jams.

EXPERIENCE | JUNIOR LECTURER WW.IT.IQ

2015-2016

During my last year and a half of studying, I was a junior lecturer giving class to 1st, 2nd and 3rd years on C# Programming and Games Programming.

- Lectured to classes consisting of around 10 students.
- Provided technical assistance with any difficulties they had.
- Guided them through the course, explaining new topics to them.
- Created extra exercises to help them grow and learn.

JAM ORGANIZER PADSTAL GAME JAM

2016

In my last year at WW.IT-IQ I started a game jam to encourage other students to make games and to better myself through perpetual jamming.

- Setup workshops to teach students about Unity.
- Setup marketing at our college to attract students.
- Logistically organized the jams.
- Provided assistance to the jammers when needed.

FREELANCE Various

I have done various contract programming work over time for clients including the following: A stock management program, Deep Sea Angling Scorer and a Golf Swing meter. These projects taught me to:

- Deliver work according to deadlines.
- Implement and change features as per the client's requests.
- Manage my time well.

EDUCATION | **UNISA**, PRETORIA (2013-2014)
ND-Electronics Engineering
WW.IT-IQ, PRETORIA (2013-2016)
Games Development
Microsoft Certified Professional (MCP)
